

Write the
name of an object.

Write the
name of a place.

Write an emotion
people feel.

Write an action word.

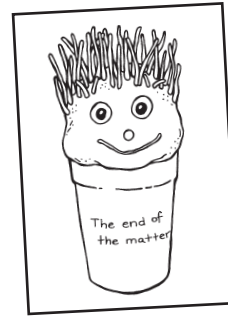

Patience Pet Care

Thoroughly soak the head of your Patience Pet in water. Fill the foam cup base with water and place the Patience Pet on top so that the bottom of the nylon is in the water. This helps keep the soil moist.

Water the top of head when it feels dry and keep the foam cup topped off with water.

Be patient! You should start seeing the grass seed sprout in about ten days to two weeks. As grass grows, you might even have to give your Patience Pet a haircut!
